

## Club Rules for Use of the Bowling Machine

Particular care must be taken when the bowling machine is used in the outdoor nets or during indoor practice.

### **The following safety guidelines must be followed:**

1. A level 2 coach will always have overall responsibility for the operation of the bowling machine.
2. All necessary regulations concerning the supply of electricity to the machine and the manufacturer's recommendations must be strictly adhered to.
3. Batsmen must take the opportunity to observe several deliveries before taking strike.
4. During practice, no adjustments to the machine will be made without the batsman being advised before receiving another delivery.
5. Adjustments to the machine will only be made under the supervision of the coach.
6. The feeder will always ensure that the batsman is ready and will indicate to him that he is about to feed the next delivery.
7. Balls should be inspected prior to use and rejected if worn or damaged.
8. Do not increase the bowling speed above that which the individual batsman can play with some degree of certainty.

9. When certain strokes are practiced, it is advisable for the feeder to have some form of physical protection.
